PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in web development, browser extension development, and cybersecurity. Google Cybersecurity Professional Certificate holder with demonstrated ability to build full-stack applications using React, JavaScript, and Supabase. Skilled in automation, data extraction, and creating Chrome extensions using Manifest V3.

EDUCATION

Bachelor in Computer Engineering

Aug 2021 – Aug 2025

Lumbini Engineering College, Pokhara University — Bhalwari, Rupendehi, Nepal

NEB Science (+2)

Jul 2019 – Jun 2021

Kalika Secondary School — Butwal, Nepal

PROJECTS

Full-Stack Web Application (www.himalayangoodwilltrek.com.np)

May 2026

- Integrated Korean and Vietnamese localization across dynamic forms, modals, and messaging channels (Zalo/KakaoTalk)
- Built responsive route elevation profile components with hover and click-to-lock active states
- Created a competitive marketing admin dashboard with an interactive ad-spend ROI calculator
- Resolved critical React Hook order lifecycle crashes and Prisma database type errors
- Technologies: Next.js, React, Prisma, JavaScript, CSS

Aetheric Realty — Real Estate Web Application

May 2026

- Built a premium real estate listing platform using React 19 and Vite with a hyper-minimalist design system
- Integrated Supabase for backend services including database, authentication, and real-time data
- Implemented responsive UI with Inter font family, custom color tokens, and mobile-first layouts
- Technologies: React, Vite, JavaScript, Supabase, CSS, ESLint

Data Extractor — Chrome Extension

May 2026

- Developed a Chrome Extension (Manifest V3) that extracts page data, YouTube details, and custom elements
- Outputs extracted data as token-optimized Markdown for efficient content processing
- Implemented side panel UI with content scripts, background service worker, and Chrome Storage API
- Technologies: JavaScript, Chrome Extensions API, HTML, CSS, Manifest V3

Mero Doctor — Healthcare Application

June 2025

- Developed a full-stack healthcare app with AI-powered pneumonia detection using DenseNet121 and Grad-CAM
- Built secure appointment scheduling and JWT-based authentication for patients, doctors, and admins
- Collaborated in a team of 5 , successfully defended the project
- Technologies: .NET Core, Flutter, SQL Server, Python (AI/ML)

CERTIFICATIONS & TRAINING

Google Cybersecurity Professional Certificate (<https://coursera.org/verify/professional-cert/8ORQJYBTN4EC>)

Dec 2025

Arduino Development Workshop

Feb 2024

Python Programming Training

Jun 2024

TECHNICAL SKILLS

Languages: JavaScript, Python, Dart, C#, HTML, CSS, SQL

Frameworks & Libraries: Next.js, React, Vite, Prisma, Flutter, .NET Core, Bootstrap

Tools & Platforms: Git, GitHub, Supabase, Chrome Extensions (Manifest V3), VS Code

Design: Figma, Canva, Adobe Photoshop

Other: Cybersecurity Fundamentals, REST APIs, Database Management,

ADDITIONAL

Languages: Nepali (Native), English (Professional), Hindi (Conversational)

Interests: Public Speaking, Community Event Organization , Blockchain
